## PRECAUTIONARY STATEMENTS

### HAZARDS TO HUMANS AND DOMESTIC ANIMALS

#### CAUTION

Harmful if swallowed or inhaled. Causes moderate eye irritation. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum. Remove contaminated clothing and wash before reuse.

#### PERSONAL PROTECTIVE EQUIPMENT (PPE)

**Mixers, loaders, applicators, and other handlers must wear:**

- Long-sleeved shirt and long pants
- Chemical-resistant gloves such as barrier laminate, butyl rubber ≥14 mils, nitrile rubber ≥14 mils, neoprene rubber ≥14 mils, polyvinyl chloride (PVC) ≥14 mils, or Viton® ≥14 mils
- Shoes plus socks
- Chemical-resistant apron when mixing/loading, cleaning up spills, or cleaning equipment, or otherwise exposed to the concentrate. See **ENGINEERING CONTROL STATEMENT** for additional requirements.

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

#### ENGINEERING CONTROL STATEMENT

When applicators use closed systems or enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d)(5)], the handler PPE requirements may be reduced or modified as specified in the WPS.

**IMPORTANT:** When reduced PPE is worn because an enclosed cab is being used, applicators must be provided all PPE specified above for "**applicators and other handlers**" and have such PPE immediately available for use in an emergency, such as a spill or equipment breakdown.

#### USER SAFETY RECOMMENDATIONS

**Users should:**

- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

#### ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from treated areas. Runoff and drift from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwaters.

Acetochlor demonstrates the properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the groundwater is shallow, may result in groundwater contamination.

Atrazine can travel (seep or leach) through soil and can enter groundwater which may be used as drinking water. Atrazine has been found in groundwater. Users are advised not to apply atrazine to sand and loamy sand soils where the water table (groundwater) is close to the surface and where these soils are very permeable, i.e., well drained. Your local agricultural agencies can provide further information on the type of soil in your area and the location of groundwater.

Acetochlor has properties that may result in surface water contamination via dissolved runoff and runoff erosion. Practices must be followed to minimize the potential for dissolved runoff and/or runoff erosion.

Refer to Use Restrictions and Tile-Outletted Terraced Fields sections for additional specific information.

Groundwater contamination may be reduced by diking and flooring of permanent liquid bulk storage sites with an impermeable material.

#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

ANY USE OF THIS PRODUCT IN AN AREA WHERE USE IS PROHIBITED IS A VIOLATION OF FEDERAL LAW. Before using this product, you must consult the Atrazine Watershed Information Center (AWIC) to determine whether the use of this product is prohibited in your watershed. AWIC can be accessed through [www.atrazine-watershed.info](http://www.atrazine-watershed.info) or 1-866-365-3014. If use of this product is prohibited in your watershed, you may return this product to your point of purchase or contact Sharda USA, LLC for a refund.

RESUBMISSION

Hi Sarah,

Here is the first label with edits (attached both clean and highlighted copies). I believe I captured all of your change requests. If not, please let me know.

Also- I believe this was one of Keeva's first labels, so I am glad you sent to me so I can take some time to review with Keeva and help train her.

Please let me know if you have any additional comments or questions. I'm working in order and should have at least one more to you today – if not both.

Thanks and take care,

Anna

ACTION REQUESTED: "Is 83529-OG similar to 524-485?"

**BACKGROUND:** The material available to CITAB includes a cover letter dated October 13, 2017, an application for pesticide registration stating that this product is similar or identical in composition and labeling to 524-485, a CSF dated October 13, 2017, a proposed label (RESTRICTED USE, with the signal word: CAUTION), and a data matrix which indicates the registrant is using cite-all to satisfy the acute toxicity data requirements.

**COMMENTS AND RECOMMENDATIONS:**

1. After a comparison of the basic CSF for 83529-OG with the CSF for 524-485, CITAB concludes that 83529-OG is toxicologically similar to 524-485.

2. The precautionary and first aid statements on the last accepted label (January 4, 2013) for EPA Reg. No. 524-485 are consistent with the results from a six-pack of toxicity studies which were reviewed in a PRS memorandum dated 3-30-95, with the following acute toxicity profile:

Acute oral LD <sub>50</sub> (rat)	III	MRID 43512602
Acute dermal LD <sub>50</sub> (rat)	IV	MRID 43512603
Acute inhalation LC <sub>50</sub> (rat)	III	MRID 43512604
Eye irritation (rabbit)	III	MRID 43512605
Skin irritation (rabbit)	IV	MRID 43512606
